## RESUME OBJECTIVE

Focused and dedicated medical technologist with a BSMT and 10+ years of professional experience in a medical laboratory. Operating advanced laboratory equipment to do complex testing on patient specimens and analysis of laboratory data. Medical tests range from cell count and compatibility tests to respirator testing on patients with all types of cancer for the prevention of disease spreading further. Working in compliance with safety protocols and carrying out regular quality control tests. Ensuring excellent patient care throughout testing procedures. Training medical staff and assistants in laboratory standard operating procedures.

---
