Devoted, empathetic patient care technician with a diploma in patient care and 5+ years of working experience. Working alongside registered nurses in the acute care nursing section. Providing assistance in planning patient care, maintaining patient care equipment, and building trusting relationships with patients. Delivering support when licensed nurses or health care team members request assistance with patient procedures, such as patient examinations, preparation of patients for vascular access cannulation, collecting blood samples, and specimen collections. Quality care and considerate communication with patients while helping with daily living needs, including personal hygiene, oral hygiene, and taking meals.

WORK EXPERIENCE**Patient Care Technician**

Jan 2018 - Present

Nandigram Super Speciality Hospital, Nandigram

- Providing quality care and helping patients with daily living activities.
 - Assisting medical staff and nursing staff with patient examinations, diagnostic procedures, patient procedures, or universal unit activities as required.
 - Updating electronic medical and patient records, completing clerical duties, and maintaining patient care equipment and other medical equipment.
 - Checking patients' plan of care and ensuring a safe environment to guarantee patient safety.
 - Routine patient care services such as administering medication at the right times, helping patients in and out of bed, bathing bed-bound patients, assisting with feeding, changing bed linen, and accompanying patients who need to leave the wards.
 - Taking action when a patient requests assistance with issues like personal care, oral hygiene, personal hygiene, catheter care, wound care, etc.
 - Reporting unusual findings to the charge nurse, emergency medical technician, or unit director, depending on who is immediately available.
-
