- Budget tracking
- Data analysis
- KPI reporting
- Project coordination
- Vendor management
- Stakeholder communication
- Microsoft Excel

Software developer with 5+ years of experience building and maintaining web applications using C#, .NET, React, and SQL Server. Skilled in API development, automated testing, and performance optimization. Delivered improvements that reduced API response times by 35% and strengthened release reliability.

Work Experience

Software Developer
Jul 2023 - Present

Cedar Bridge Software, Austin, TX

- Develop customer-facing features and REST APIs for a retail platform serving 40 business clients.
- Optimized SQL queries and introduced caching, reducing average API response times by 35%.
- Built a React dashboard that replaced manual weekly reporting for client account teams.
- Added automated tests for checkout and account workflows, helping reduce production defects by 25% over six months.
- Collaborate with product managers, designers, and QA engineers to scope features, review code, and resolve issues.

Junior Software Developer
Jun 2021 - Jul 2023

Clearpath Digital Solutions, Round Rock, TX

- Built and maintained C# and JavaScript features for inventory and order management applications.
- Developed reusable form components used across six internal tools.
- Investigated bugs, wrote regression tests, and documented fixes with senior developers.
- Automated a daily data import, saving the operations team approximately five hours per week.
