Profile

Technical project manager with over 15 years of experience in technology procurement, project management, implementation of technology solutions, and change management across several industries. Full project life cycle experience for projects with a duration from one to 24 months, development budgets of $20k to $2 million, and project teams from two to 50 members.

Work Experience

May 2011 - Present

Technical Project Manager

Aerial Technology Incorporated, Springfield

Manage project teams of up to 50 with budgets of up to $2 million to deliver quality results on time in a high- pressure, time- sensitive environment.

- Follow best practices of agile methodology, produce innovative solutions for complex problems, and establish collaborative problem solving
- Oversee complicated multi- phase, multi- year projects while creating solutions in partnership with a remotely located engineering and vendor team
- Technical project manager for an automated web- based, enterprise- wide technical application used by grant recipients and applicants across 50 states

Feb 2006 - Apr 2011

Technical Project Manager

Elliot Smith Associates, Chicago

Migrated technology initiative to convert tens of thousands of users from Windows ME To XP while upgrading to 2.4 GHz desktops.

- Created and oversaw a $20 million budget for international and domestic vendor service, software, and hardware
- Incorporated quality control through release management through the definition of the technical environment, execution of mass production hardware deployments, and classification of applications

Skills

Custom Software Development, Database Design, Systems Engineering, Systems Migration & Integration, Enterprisewide Implementations, Requirements Analysis, Cross-Functional Supervision, Project Scheduling

Education

Aug 1996 - May 2000

Bachelor of Science Computer Information Systems

University of Chicago, Chicago
